Date: April 7, 2015

Re: **Integrated Pesticide Management Notice**

This is an Integrated Pesticide Management Notice from Arlington Heights School District 25. The dates of the upcoming applications were chosen based on school class schedules and school activities. Due to a number of climate conditions, which must be met when applying weed control, we are not able to provide you with the exact date of application. Only after school grounds have been inspected for weed population and all other options for weed control considered, will a herbicide be used, and always at the lowest effective rate for the targeted weeds. All school areas are posted 24 hours in advance, and remain posted 24 hours after application. Postings may also be checked at the Arlington Heights School District 25 website.

Dates of upcoming applications:

Barricade for crabgrass per-emergent will be applied for Broadleaf weeds (28-0-5 Fertilizer and/or Mec-Amine D) to all Arlington Heights School District 25 building lawns and fields during the time period of April 17 through May 17.

We appreciate your patience and flexibility in this matter. This will be beneficial to both parties as it will improve the condition of school properties and enhance the areas of the neighborhood properties where the schools are located.

If you have any questions or concerns, please don't hesitate to call 847-506-6903
