## INFORMATION ITEMS

### Superintendent - Consolidation Study Consideration

This item was brought to discussion due to District 57's inquiry to their neighboring districts on whether or not they would consider pursuing a study about district consolidation. During this discussion item, District 25 Superintendent Dr. Bein informed the board that District 25 does not believe it would be beneficial to the residents, staff or students of their District to consolidate with D57.

Based on the information that Dr. Bein shared and a discussion held in open session, the D25 BOE determined that a consolidation study is **not** needed.
