

# SOUTH MIDDLE SCHOOL ONLINE COURSE CALENDAR AND RESOURCES

Schoology is an online learning management system our teachers increasingly use to extend learning beyond the classroom, provide additional modes for students to access and interact with course content and ideas, and communicate course assignments and information.

- All teachers use the online calendar feature. The online calendar is a nice reference for students and parents to double check class due dates, homework assignments, etc.
- Many teachers will post class resources on Schoology like handouts, videos, online assignments, etc.
- Schoology can be used for daily in-class learning activities. Students will sometimes refer to class presentation notes, access a project, review directions, complete an online assessment, etc.
- We are in year three of implementation, so you may see some variation in the degree to which teachers use Schoology.
- Both students and parents will receive login information and other student/parent resources will be posted on our website. (\*\*Parents can make their Schoology/PowerSchool passwords the same.)
- Students are still given time to record assignments in their South planners and should consistently come home knowing what to do.
